

Pictured Dr. Robert Knadle, District Administrator; Bailey Nelson, HS Student; Mr. Lloyd Hardy, HS Teacher; Jake Baumgartner, HS Student; Mack Chamberlain, HS Student; Dalton Burckhardt, HS Student; Randy Knadle, River City Ready Mix; Scott Leum, HOPE; Jenny Leum, HOPE; Scott Mills, School Board President; Carl Volden, HOPE; Michael Reuter, Ethos Green Power.

The panel will offset some of the district's energy use, and the savings will be directed toward scholarships for students interested in renewable energy. The real value will be the hands-on learning, District Administrator Dr. Knadle said. "Students in Mr. Hardy's Construction class, assisted in the assembly of the structure. Our students will experience the value of the science behind it, what we're generating, renewability, all the way up to our physics classes and high school math classes."

Viroqua Area Schools extends their thanks and appreciation for the donation of a 2-kilowatt solar panel that has been installed on the school district's campus in Viroqua. Pictured above are representatives from the school district including students that worked on the project, HOPE (Harmony town Opposing Pollution of the Environment), River City Ready Mix, Ethos Green Power. Other contributors to this project were Phil Dearborn, CRJ Electric and Alicia Leinberger, Ethos Green Power.
